SHEPHERD TONE ENHANCERS

The unique design concept of the Tone Enhancers stabilizes and controls the air flow distribution to the drone reeds, thus dramatically increasing the air efficiency of your instrument. The Acoustic Pads used are moisture resistant giving the added advantage of moisture control for drone reeds.

By adding hemp, fit the tone enhancer to stock.

Take care when fitting or removing enhancer to stock always screw in a clockwise direction. This will prevent the enhancer lid from becoming unattached.
